- github.com/ChaceN89

Software Engineer specializing in full-stack web development and game design with experience building scalable web applications and interactive Unity games. Focused on clean architecture, responsive design, readable code, and an accessible user experience.

## Work Experience

### Alberta Tomorrow – Full-Stack Web Developer

January 2024 – Present

Education Technology platform used by over **10,000** Alberta students from junior high to post-secondary.

- Developed and maintained an interactive EdTech web app featuring historical simulations, data-driven exploration, lesson plans and related educational resources.
- Designed and **built the platform's homepage** with an accessible, responsive UI and intuitive navigation.
- Prototyped additional educational tools using Unity Game Engine.
- **Tech Stack:** *Vue.js, Next.js, JavaScript, HTML/CSS, Python, AWS, Unity*

### Glass Gecko Games – Game/Web Developer

May 2024 – Present

Indie game studio focused on building 2D video games.

- Designed and implemented engaging Unity game mechanics in collaboration with artists and developers.
- Developed and launched the company website, attracting roughly **200 weekly visitors**.
- Created the award-winning fishing game Scale the Depths, winner of the 2024 GMTK Game Jam with over **200,000 plays**, a Steam demo and a full version with more than **45,000** followers.
- **Tech Stack:** *Unity, C#, Plastic SCM, React.js, Tailwind CSS*

### U of C Geothermal Center – Lead Software Developer

May 2022 – January 2024

Software development for geothermal research tools leveraging international drilling data and ML models.

- Led development of a web app that analyzed international geothermal drilling data using ML models.
- Managed a team of **10 developers**, overseeing all layers of the application stack and project execution.
- Received the **Intern of Merit** award for exceptional performance.
- Led code reviews and interviewed candidates for new developer roles.
- **Tech Stack:** *React.js, Tailwind CSS, FastAPI, PostgreSQL, Python, Docker*

## Education

### Bachelor of Science in Software Engineering

May 2024 - University of Calgary

- Schulich School of Engineering – 3.6 GPA – With Distinction.

## Technical Skills

**Frameworks & Libraries:** React.js, Next.js, Vue.js, Express.js, Django, Tailwind CSS, Unity Game Engine

**Languages:** C#, Python, JavaScript, TypeScript, C/C++, Java, SQL, HTML/CSS

**Tools & Practices:** Docker, AWS, Git/GitHub, Plastic SCM, Agile, Scrum, Accessibility, Responsive Design

**Soft Skills:** Communication, Adaptability, Creativity, Innovation, Documentation, Teamwork, Problem solving.

## Projects

**PageFlow Library:** A full-stack document platform using AWS, S3, Next.js, Django and PostgreSQL.

**Functional Mini Drill Rig:** An Embedded systems project placing 2nd in the international DrillBotics competition.

**Voice Identification:** A Machine learning system for voice verification using CNN and GMM models.

## Leadership and Recognition

**Volunteer Work:** Coached youth basketball with Bow Valley High School and Cochrane Eagles Basketball Association. Participated in an international service trip with the Homes of Hope organization.

**Additional Roles:** Certified referee with the Calgary Basketball Officials Association.

**Athletics:** Named MVP of the Rocky View Basketball League while playing for Cochrane High and competed for two seasons with the Medicine Hat College men's basketball team.
